

# TURN YOUR EXCAVATOR INTO A POWERFUL MOBILE CRUSHING UNIT

Mobile crushing units offer contractors a range of crushing solutions and have proved to be an efficient alternative to larger crushing plants.

Simply attached to your excavator q/hitch and powered by aux. hammer piping, these MB units sold under the BOST range are available for excavators eight to 80+ tonnes.

Crushing material such as concrete, rock, asphalt, and rubble - units incorporate a single toggle jaw crusher and allow operators to easily load, crush, and deposit material in one simple process. Bucket capacity ranges from 0.5-1.0m<sup>3</sup>, in four different models.

Through-put of material can be up to 50m<sup>3</sup>/Hr and jaw adjustability ranges from 20-120mm of finished material.

The BOST range also offers specialised jaw plate options which are completely interchangeable and reversible.

With increasing costs in material transportation and disposal, contractors are now able to crush and re-use material without having to transport off-site.

## MB S.P.A THE VICENZA-BASED COMPANY AMAZES ONCE AGAIN: THE UNIVERSAL QUICK COUPLING

MB S.p.A., the Vicenza-based world leader in the production and sale of crusher buckets, never ceases to amaze. As of 2010 the company has put its name on a brilliant idea, the Universal Quick Coupling, a winning piece of equipment making on-site jobs as easy as possible.

Available in seven versions, the new Universal Quick Coupling allows very short installation times for all kinds of equipment, from the crusher bucket to the hammer and the traditional bucket to the drill. This new product improves pick-up geometry by reducing the distance between the excavator arm and the equipment used, thus speeding up the jobs carried out on site.

And that is not all. The strain on the excavator is also diminished, thanks to reduction of more than 50 per cent of the weight compared to traditional couplings offered on the market. It's quick and versatile and makes assembly operations easy thanks to the possibility of quickly assembling the pieces of equipment on both sides (front and back).

The equipment offered by MB S.p.A has made the company extremely competitive and well-known at an international level in just a few years.

### GOOD LOOKING, HARD WORKING, LONG LASTING... WHAT MORE COULD YOU WANT?

**DIESEL REFUELLING UNITS**

- Pad-lockable filler lid
- Easy clean suction strainer
- Anti-kink spring fitted to hose
- 3/4" auto shut-off nozzle
- 6 metres of 20mm anti-static delivery hose
- 3/4" drain bung
- Tank manufactured from specifically formulated diesel grade polyethylene
- Fluid 40 litre/min pump with On/off switch
- 2 metres of electrical cable with battery clips

**NEW**

Ball baffles fitted for improved vehicle stability

**With fully enclosed pump compartment**

DL20012VA40  
200 LITRE/40 L/M PUMP

DL40012VA40  
400 LITRE/40 L/M PUMP

DL45012VA40  
450 LITRE/40 L/M PUMP

**DIESEL TRANSPORT TANKS**

200, 400, 600, 800, 1000, 1500, 2000, 2500, 3000, 4400, 7000, 8000 & 10000 LITRE TANKS AVAILABLE

**FLUID PUMP KITS**

40 & 60 L/M UNITS

Made in Italy

### MOVING liquids? THE POLY TANK ADVANTAGE - LIGHTWEIGHT, SAFE, DURABLE, RUST FREE

**FREE STANDING CARTAGE TANKS FROM 100 TO 13000 LITRE**

**Liquid surge protection for safer liquid cartage**

**LOADSAFE AUSTRALIA APPROVED**

**rapid ballbaffle system**

- Reduces wear and tear on vehicles
- Suitable for use with all tanks - steel, aluminium, poly, fibreglass, diesel etc.
- Simple to install
- Food grade quality material
- No rust, lightweight & durable
- Low liquid displacement
- Replace your rusted, cracked or broken fixed baffles with these

Don't try this without ball baffles!

**MODULAR CARTAGE TANKS NEW & PATENTED**

- Large size range
- Lightweight
- No rust
- Safety by design
- Durable
- Extra payload
- Proven Pin Point Mount System
- Expandable tank capacity

**NEW hi-flow joiner & cross baffle**

**AVAILABLE IN SIZES FROM 4000 TO 30,000 LITRES**

**rapid spray** www.rapidspray.net

**FREECALL 1800 011 000**
