

Play time

Playscape Creations has launched their new innovative and diverse range of products.

The HealthBeat Outdoor Fitness System has been incredibly popular, with local councils recognising the structural integrity and holistic design of this equipment.

The "Sway Fun" - an All Abilities Glider allowing ample room for two wheelchair passengers to join eight additional users, of all ages and abilities - is also a great piece.

The "Evos" Play systems attract kids with their uniquely challenging play experiences and are constructed from 81 per cent recycled content! [CL](#)

The Scarab Minor

Over the last 20 years the Scarab Minor has been proven to be one of the most reliable and versatile compact road/footpath sweepers of its class. The fully imported Scarab Minor has been a successful, ever popular part of the Rosmech stable, having a strong effect on the Australian sweeper market.

The Scarab Minor outclasses its peers as it has

the capability of a greater work rate thanks to its greater road speed of 65 km/h, hydrostatic drive system, compact dimensions, generous payload capacity, a large water tank and also its strong chassis.

Powered by a VM Motori 3.0 litre turbo-charged Euro IV diesel engine with high pressure direct injection, both fuel consumption and exhaust emissions have been reduced with the Euro IV model, making the Scarab Minor not only more efficient but also a more environmentally friendly option.

Being compact makes the Scarab Minor ideal for precinct sweeping, CBD sweeping, car park and bike path sweeping. Though compact in size, the powerful Scarab Minor VM is also capable of most arduous tasks usually undertaken by larger truck mounted sweepers. [CL](#)

The MB bucket crusher

The MB bucket crusher was the first of its kind to arrive on the market and operates by exploiting the hydraulic system of the excavators on which it is installed. It can be used on the entire range of excavators, from eight tonnes upwards, and its areas of application are numerous: demolition work, building work in general, upgrading of ex industrial and urban areas, treatment of material from excavation work, the earth moving sector and road work, quarries and mines, environmental clearance work and rock breaking applications.

MB S.p.A. offers four models of bucket crusher, available for a vast range of excavators, which can be used on all brands and models from eight tonnes upwards. The flexibility of the bucket crusher is extraordinary, enabling small and large firms alike, working in the building, demolition, and earth moving sectors in general, to recycle material obtained from crushing directly on site. MB products are highly efficient, not only in building and excavation work, but also in special applications. [CL](#)

perfect products.

ZW Compact Wheel Loaders

Hitachi Construction Machinery (Australia) Pty Ltd is pleased to announce the extension of its ZW Wheel Loader range, with an introduction of the new ZW40 and ZW50 Compact Wheel Loaders.

Through thorough research and the implementation of innovative design, the new ZW Compact Wheel Loaders deliver optimum function, economy and operator comfort. These compact machines combine mobility and agility with strong performance to provide a loading tool capable of performing a range of tasks in

very confined spaces. The ZW40 and ZW50 Wheel Loaders are perfectly suited to a variety of applications, including landscaping, agriculture, light construction and waste disposal.

The overall machine strength and durability has been improved over the precursor LX-series through the introduction of a reinforced mainframe, box construction for front and rear frames, and the use of increased plate thickness. This results in longer machine life, and the ability to work in even the harshest of environments. [CL](#)
