

### NEW TRUCK-MOUNTED CONCRETE PUMPS

Schwing-Stetter is presenting new product developments in all fields of concrete production and handling technology: concrete mixing plants, truck mixers and concrete pumps as well as placing booms.

Among others, Schwing-Stetter will present two new truck-mounted concrete pumps – one in the 20 m class, and another in the 40 m full-size boom class. There will also be innovations in the new stationary concrete pumps.

A new separate placing boom and a new mixing plant will also be presented, rounding off the range of products. Schwing-Stetter will exhibit its range of products at the Bauma 2010 on a surface of 2.120 m<sup>2</sup>.

### HIGH-PERFORMANCE CRANE MODELS

During the last two years, Palfinger has positioned 32 new High Performance crane models in the market along all performance categories. Although top lifting moment with the dead load remained almost the same, a highly functional design, a maintenance-free extension boom system, Power Link Plus and Single Link Plus reverse linkage systems are just some of highlights and performance features that have found a particularly positive resonance in the market.

The Palfinger stand will also show a PK 50002 EH and a PK 26002 EH High Performance cranes as ambassadors of the High Performers. The secrets of PK 19502 and PK 22002 EH High Performance will be disclosed at the world premiere when they will be shown to the public for the first time.

A new standing platform, a new fly jib, a new workman basket and a new series of additional stabilizers will also be shown at Bauma for the first time. The focus to be announced on the stand of Palfinger Platforms – on open-air site F 13, stand 1304/1 – together with a Wumag Palfinger WT 1000 and a P 260 B in a variety of different body versions will be a brand new access platform of the Jumbo class.

A whole series of experienced and tested solutions will be added to the extensive product range shown on the Palfinger stand: truck-mounted cranes with interesting equipment options for the construction industry, new PC cranes, Epsolution recycling cranes (including the new patent pending Easy-Fold system), PAK 13 H skiploader, a selection of transportable forklifts by Crayler and a MBB tail lift.

### TOWARDS GERMANY

The Italian MB S.p.A shows its line of crushing buckets, indicated mainly for demolition, excavation, restoration, material recycling and construction in general. The models are used as an implement of hydraulic excavators which cover the range of 8 to 28 ton.

The latest crushing bucket is the BF 90.3. This model, which has a capacity of 0.75 cu.mt, weighs 3,500 kg, is suitable for machines from 20 to 28 tons of operating weight and produces a material with particle size between 60 and 80 mm.

Now, MB is opening a new office in Germany. "The opening of the German branch is an exciting event. We saw in first-hand just how much enthusiasm the opening of this unit has instilled both into our consolidated clients and our potential customers. We adopted an approach of great discretion, but with the determination ensured by the awareness of being a company that offers a winning product and by the fact that there are excellent prospects of great success", said the managing director Guido Azzolin.
