“Ideal for large projects”

A large bucket to ensure great results for construction projects. The BF 120.4 S2 is suitable for excavators weighing more than 68,300 pounds. It was created to meet the specific needs of crushing in quarries and landfills for aggregate recycling, and in large job sites to reduce the volume of materials resulting from demolition work.

With a production rate from 20 cy/h to 65 cy/h depending on the output adjustment, a capacity of 1.70 cubic yards, and a total weight of 10,803 pounds, the BF 120.4 S2 crusher bucket is an effective machine that has established itself as the premier crusher in the crushing field in just a few years.
