

MB-S10 S2

“Small and efficient”

The smallest of the MB screening bucket line. It is designed for mini excavators starting at a machine weight from 8,800 to 19,800 pounds. It is a great choice for small yards and landscaping jobs.

It can be used for both pre- and post-crushing jobs. the MB-S10 S2 screening bucket can reduce crushing time up to 60% by screening out unwanted material (quarry residue, dry soil, and river stone) of any kind. This makes it convenient for on-site processing.

Crucial in space limited applications.

MB screening buckets are equipped with baskets formed by interchangeable modular panels that are available with holes of different sizes based on requirements.

PRIMARY SELECTION:

WASTE MATERIAL
DEMOLITION MATERIAL
EXCAVATION FILLING MATERIAL
PEBBLES IN STREAMS
DEBRIS IN BEACHES
NATURAL STONES CLEANING
