

# EYE ON THE INDUSTRY

## ENZED HAS A HOSE TO FIT EVERY MACHINE

**ENZED has a hose to fit every machine – guaranteed. All ENZED stores and Hose Doctor vans carry a complete range of hose and fittings compatible with all brands of earthmoving equipment.**

Unexpected downtime due to hose failure is not only frustrating but expensive. That's why ENZED has the stock available to do the job right, the first

time. ENZED vans have the most extensive range of Parker hose and fittings compared to any other mobile supplier. This allows ENZED to arrive on-site fast, with the right product to keep your machinery operating longer.

ENZED only use high quality, matched Parker hose and fittings and when you call ENZED you can expect the personalised service of a small

business operator that is backed by the resources of a world leader.

ENZED is part of the Parker Hannifin Corporation - the world's leading diversified manufacturer of motion and control technologies, providing precision-engineered solutions for a wide variety of commercial, mobile and industrial markets. Parker products are fitted as original equipment by more OEM's (Original Equipment Manufacturers) than any other manufacturer in the world.

No matter the type of machinery, when you blow a hose and you're suffering from downtime, ENZED Hose Doctors can get your excavators, bobcats, and dozers operating again. ENZED Hose Doctors work on site to repair or replace hose and fittings and will be at your site within 15 minutes of the agreed time - this is known as the On Time, Any Time Guarantee.

ENZED has a network of 73 service centres and over 240 mobile Hose Doctors throughout Australia. To get you back up and running again, ENZED HOSE DOCTORS can be contacted anytime on the national hotline 24 hours a day, 7 days. **Call 13 13 62** next time you have a hose failure. ## THE NEW BF: MB ANSWER TO CUSTOMERS NEEDS

**MB S.p.A presented the new version of the bucket crusher at the Paris trade fair Intermat**

MB S.p.A., a Vicenza company and worldwide leader in the production and sales of bucket crushers, was at the Intermat trade fair in Paris (April 20-25) to present its latest bucket crusher. This new crusher is the result of ongoing investments in technological research and the continuous attention to its customers' needs. The company decided to present this new crusher during one of the most important international construction trade fairs, to highlight the importance of the event.

The historic model has been transformed to offer an even more revolutionary product on the market, thanks to the in-depth research of the MB team and technical engineers. The company is committed to the constant satisfaction of customers' requirements, ever attentive to their needs, carefully listening to all problems faced every day on construction sites and finding solutions most suited to the various international situations in which MB S.p.A. operates. Long-lasting relationships and loyalty of clients also contributes to MB's ability

to produce bucket crushers that represent a valid work tool. The new bucket crusher is more resistant in work, featuring a more compact size and improved structural layout to facilitate operator manoeuvres on the excavator.

Despite the world crisis affecting all sectors, MB confirms its success and continues to invest in research and development, giving priority to vertical specialisation in the production of a single product that enables the guarantee of high-quality and top-performing bucket crushers. Also, company participation in major national and international events in this sector has enabled MB to establish and strengthen relationships and loyalty with clients, who always receive special attention.

At the Intermat fair, MB S.p.A. presented a historical product of the MB house in a modernised version, once again demonstrating the investments in research and technology ensures the company achieves the maximum levels of quality and satisfaction.
