# “The bucket that made **history**”

The first crusher bucket, produced and patented by MB in 2001, is still the most popular model for medium- to large-sized companies.

Renewed and improved over the years, the BF 90.3 S3 is suitable for excavators over 46,300 pounds in weight. It is compact, versatile, and ideal for all types of recycling operations, road work, pipelines, demolition, and excavation.

The BF 90.3 S3 weighs over 7,000 pounds and has a load capacity of 1.18 cubic yards. Despite its size and weight compared to the larger models, it achieves a production rate from 16 cy/h to 54 cy/h, depending on the output adjustment.

## AREAS OF APPLICATION
