

# MB CRUSHER AMERICA, INC.

**F**ifteen years ago, the vision was to manufacture a mobile crusher that could attach itself to a range of excavators, with the crushing capabilities of a traditional crusher and the flexibility to work in tight areas. Thus, Carlo Azzolin and his family add a new type of machinery to the market—the crusher bucket.

In 2001, the family business was known as MB Crusher, led by Azzolin's five children. MB Crusher has expanded worldwide, with seven international subsidiaries and a large network of dealers and distributors who sell to more than 150 countries.

Over the years, the company expanded its first BF90.3 crusher bucket, a patented jaw crusher, into a full product line with several different models and sizes. Initially created for a range of excavators, the company has expanded its crusher line to include skid loaders, loaders, and backhoes.

The mobile crushers allow contractors to recycle waste materials immediately at the jobsite rather than have the materials transported. They can reduce transportation and material buyback costs.

The crushing attachments can crush railway sleepers, hollow core walls, reinforced and non-reinforced concrete, natural stone, and asphalt into reusable aggregate materials for base or fill. In addition, the materials can be saved for another project or sold for new revenue, allowing contractors to increase their independence and grow their businesses.

MB's crushing product line has expanded to include trommel screening attachments, 360° rotation grapples, and dual-head rotary drum cutters for a wide range of industries and jobsites, including demolition, excavation, road work, quarries, mining, pipeline work, and environmental reclamation projects.

The company has continued to shape and evolve the crushing industry, while keeping in mind the customers' needs and providing them with a cost-effective and greener option for the environment. ■

For information, visit [www.mbamerica.com](http://www.mbamerica.com), or contact the company at 855.MB.CRUSH (855.622.7874). Federal customers can purchase MB's products through the GSA Advantage! catalog at <http://bit.ly/mbsagov>, or through its contract number, GS.30F.007DA.
