## ROTATION POWER EXTENDER KIT

The MB rotation power extender kit can be installed on top of the MB grapple. It magnifies the rotation strength of the grapples and allows for moving heavy material with extreme ease.

## GRIP IMPROVEMENT KIT

The MB grip improvement kit is installed on the internal side of the MB grapple. It allows the client to move particularly heavy and unusual shapes with more ease, grip, and precision.

## MULTIPURPOSE BLADE KIT

The MB multipurpose blade kit is a replacement of the yellow blade at the end of the MB grapple. It has a double blade feature: it is toothed on one side and smooth on the other. The blades are easily and quickly interchangeable. It is available for all MB grapple models.

## RUBBER PROTECTION KIT

The rubber protection kit is installed on the internal part of the MB grapple. It is equipped with rubber edges to move linear and delicate material. Its tilting structure allows clients to pick up different sizes of material.

## CLAM SHELL KIT

The MB clam shell kit is manufactured to move and pick up small-sized material. It is easy and quick to install.
