

'MB TAX CRUSHERS'

FOR 11 MONTHS OF THE YEAR MB CRUSHER UNITS CRUSH ROCKS, PEBBLES, BASALTS, REINFORCED CONCRETE AND SANDSTONE BUT THIS MONTH IT CAN ALSO HELP YOU TO CRUSH YOUR TAXES!

By making your fleet more valuable, you can now write off up to \$150K as part of the economic stimulus package targeting the construction industry.

Construction and demolition companies are resilient and resourceful; we all know that. What is needed in the industry is time. Deadlines are always fast approaching, unforeseen delays always around the corner. With an MB Crusher you can use your digger, which is already onsite to turn debris into useable high-quality aggregates. How much time would this save you? No trips to landfill, no costs to purchase aggregates and no delivery needed.

MB Crusher offer five different lines of crusher attachments, which work on any brand of excavator, skid steer or wheel loader.

Do you have a stockpile of demolition debris or excavated rock that if reduced in size can be reused? MB Crusher makes the jaw **crushers buckets**, a mobile jaw crusher that can reduce to any needed size. Just scoop up the material and crush it into high-quality product. Even reinforced concrete is no problem!

The optional **iron separator** attaches easily on the bucket separating, crushing and reclaiming the iron portion with ease. The **nebulizer** reduces the dust from the crushing whilst operating meaning urban area work is no problem. Both kits are operated directly from the cab. All three actions in one operation deliver remarkable time savings.

Construction and demolition **waste** taken to landfill is currently being looked into by governments to reduce the percentage of waste through recycling.

Buy an Mb Crusher unit now, get your tax back and turn debris into a **productive resource** on site to fill new foundations, trenching excavations, road surfacing, or in gardens as decoration elements.

An MB Crusher is a win-win solution for your company so visit mbcrusher.com for more information or contact them directly at info@mbcrusher.com
