

MB CRUSHER AWARDED 'PRODUCT OF THE YEAR' AT POLANDS AUTOSTRADA POLSKA

Between 14th-16th May 2008, the Italian company, MB CRUSHER, known in Italy as MB MECCANICA BREGANZESE S.R.L., took part in the KIELCE trade fair, also known as AUTOSTRADA POLSKA. This international trade fair took place in Poland.

MB organised an indoor stand and a demonstration area, set up with everything needed to show our customers the exceptional performance of our bucket crusher. Over 800 exhibitors from 26 different countries took part in the trade show! And over 200 different kinds of equipment were exhibited from around the world including roadwork, demolition, construction and building equipment.

AUTOSTRADA POLSKA is one of the largest trade fairs in Poland for the road building industry and this year, participation exceeded all expectations: considering the exhibitors arrived from ALL over the world! Perhaps, these days' companies generally feel the need to compare their products with those produced the world over. In 2006, Autostrada Polska boasted 753 exhibitors from 23 countries.

As well as participating with an indoor stand, together with its Polish, German, Austrian, etc .. associates, MB also exhibited its bucket crusher with iron separator, exclusively for the Croatia/Polish public. And we must say that once again the post-show success was immediate. MB is growing all the time and in fact, during the fair, we were approached by the fair staff who were handing leaflets out ... at first we thought they were some kind of invoice, as we had to sign for receipt but then in the evening, when the MB staff ,after a long day's work, were checking the document, we realised that it was an entry form for an award!!! And it was for the product of the year to be announced at the Autostrada Polska!

As anyone who knows MB knows, we do not close doors to anyone or to anything. So... we thought, why not participate? We filled in the form and delivered it to the management as required. On the last day, as specified on the form, the MB agents took their place in the special pavilion, curious to take part in the famous and sought-after awards: and to our surprise... with a drum roll, the jury representatives stood to announce the winner: the award went once again to MB!!!

We really are receiving a considerable number of awards; the technological innovation of this product is particularly impressive and is very rewarding. Nothing can stop the amazing company from Breganze! It is such a small town, that if you were to stop through for a moment, you would not believe that anything apart from vineyards, could have developed from a town of such a small population. But, in 2001, a dealership was opened, the first in a commercial network that began to grow little by little, firstly with four, then ten, then twenty and so on, to reach an astounding three hundred! MB Meccanica Breganzese are so pleased with their product, that has made them become the WORLD leader in the production and sale of jaw-action bucket crushers.

Our demonstration yard in Breganze is open 7 days a week - why not make an appointment to come and see how our demonstration area is set up for our customers? As we are always fairly heavily booked, please do not hesitate to contact us to arrange a suitable viewing time! We are pleased to satisfy all of our customers' requests!

For further information on the closest demonstration yard to you, contact MB on +39 0445 308148 or book a demo or visit to our company through our web site www.mbcruiser.com
